

Important Information and Transition Dates for Waukeee Garbage Customers

The City of Waukeee is transitioning to a new solid waste management provider. The switch to ASI will be fully effective Monday, June 27.

The solid waste transition has been designed to provide ease for residents. Please note that the City is going from a Thursday/Friday collection schedule to Monday through Friday. This may change your garbage and recycling collection day. Locate your neighborhood on the map on the back of this page to determine your collection day. Also, recycling will now be collected every week. Yard waste collection will continue on Mondays as usual.

Key Transition Dates:

June 16-17

- Put both trash and recycling containers out on the curb. Waste Management will empty both. Waste Management will then take only the recycling bins away.
- ASI will deliver a new recycling bin.

June 23-24

- Put your trash container out on the curb. Waste Management will empty it. Waste Management will then take the trash bin away.
- ASI will deliver a new trash bin.

June 27-July 1

- This will be the full week of the new schedule and provider.
- Yard waste collection will continue on Mondays as usual under ASI.
- The new schedule includes weekly recycling collection.

July 5-9

- All garbage, recycling and yard waste collection will be delayed one day due to the Independence Day holiday.

As a reminder, ASI's default containers hold 96 gallons. However, if you would like a smaller container, a 64-gallon version is available as an alternative. Please call 515-964-5229 or email custserv@ankenysanitation.com by June 10, 2016 to request the smaller container.

Prior to the June 27 switch, call 515-978-5502 with any questions. After June 27, all garbage and recycling-related questions can be directed to ASI at 515-964-5229.

We appreciate your patience throughout this process.

DETERMINE YOUR GARBAGE COLLECTION DAY!
